TITLE : SKIN CLEANING AGENT COMPOSITION AND PRODUCTION THEREOF

ABSTRACT : PURPOSE: To obtain a creamy skin cleaning agent composition, by blending an alkali metallic salt of N-acyl acidic amino acid with a polyvalent metallic salt of N-acyl acidic amino acid and an N-acyl acidic amino acid in a specific blending ratio.

CONSTITUTION: 30~65wt.% at least one of an alkali metallic salt and an organic amine salt of an N-acyl acidic amino acid is blended with 5~40wt.% polyvalent metallic salt of N-acyl acidic amino acid and 15~40wt.% N-acyl acidic amino acid. The blend is optionally mixed with an emulsifying agent, wetting agent or dispersion stability and dissolved under heating at 50~100°C to give the aimed substance. The skin cleaning agent has low irritation to the skin and excellent washing properties, rapidly removes sliminess, has improved high- temperature viscosity stability, shape retention is suitably usable for person with skin sensitivity or patient of skin disease. The skin cleaning agent has no change in feeling in use and in appearance even in summer and in the torrid zone and causes no change in quality.
